

Upgrading from SQL 2005 on a 32-bit computer

Short Description: How to upgrade SQL 2005 Express to SQL 2014 Express

Note: SQL 2005 is incompatible with PigCHAMP version 7 and higher.

Process:

All steps must be completed on the computer hosting the PigCHAMP SQL Server database

1. Make sure everyone is out of PigCHAMP and make a current backup of your database. Keep it someplace safe – not in the SQL folder
 - a. You can use PigCHAMP Backup and Restore Utility or SQL Management Studio to create the backup file
 - b. Save the backup to a safe location. Do not save it in the SQL installation folder.
2. Download SQL 2014 Express from here: <https://www.microsoft.com/en-us/download/details.aspx?id=42299>
 - a. Choose Express 32bit\SQLEXPRESS_x86_ENU
3. Run the SQL 2014 Express that you just downloaded
 - a. Choose to upgrade an existing instance
4. Open PigCHAMP and verify that all works correctly

Upgrade from SQL Server 2005, SQL Server 2008, SQL Server 2008 R2 or SQL Server 2012
Launch a wizard to upgrade SQL Server 2005, SQL Server 2008, SQL Server 2008 R2 or SQL Server 2012 to SQL Server 2014.

Determine if you have 32 or 64 bit Computer (Windows 7, Vista, 8)

1. Click on the Start menu
 - a. On the right hand side, right click on “My Computer” or “Computer” and choose Properties.
2. A screen will appear with details about your computer operating system. Look for your “System Type”. It will be either 32-bit or 64-bit.

Determine if you have 32 or 64 bit Computer (Windows 10)

1. Right click on the Start button.
 - a. Choose System
2. A screen will appear with details about your computer operating system. Look for your “System Type”. It will be either 32-bit or 64-bit.
